Date: August 19, 2026

To: Hiring Team at Decipher Bureau

Position: Senior Backend Engineer

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Senior Backend Engineer position at Decipher Bureau. As a Python Backend Developer with deep expertise in Python, FastAPI, PostgreSQL, I have consistently focused on building scalable, reliable, and high-performance server architectures. Decipher Bureau's commitment to engineering excellence strongly resonates with my background in architecting enterprise APIs and distributed systems.

In my work at Levitica Technologies, I engineered RESTful backend services using FastAPI and Django for multi-tenant SaaS platforms, optimizing database query execution to achieve a 30% reduction in API response times. Additionally, I architected event-driven asynchronous pipelines with Apache Kafka and Redis, implementing secure JWT authentication and RBAC protocols across core modules. Recently, I designed and deployed Elevora ResumeAI (<https://resumeai.elevora.software>), an AI-driven platform featuring token bucket rate limiting and a 100-point ATS scoring engine.

I am excited about the opportunity to bring my hands-on problem-solving mindset, backend engineering discipline, and experience with Python to Decipher Bureau. I welcome the opportunity to discuss how my technical skills can directly support your team's upcoming milestones.

Thank you for your time and consideration.

Sincerely,

SASI KUMAR REDDY CHINTALA
